Woodworking Terms You May Not Be Familiar With:

DRILL PRESS: A tall upright machine useful for suddenly snatching flat metal bar stock out of your hands so that it smacks you in the chest and flings your beer across the room, denting the freshly-painted project which you had carefully set in the corner where nothing could get to it.

CHANNEL LOCKS:
Used to round off bolt heads. Sometimes used in the creation of blood-blisters.

HACKSAW:
One of a family of cutting tools built on the Ouija board principle... It transforms human energy into a crooked, unpredictable motion, and the more you attempt to influence its course, the more dismal your future becomes.

More to come in next newsletter. Thanks to Bill Payne
